AI Vision Template

This template was created to facilitate the development of an AI vision. Each question should be a basis for gathering information and discussions. The answer to the first three questions are the foundation for formulating the AI vision one-liner in question 4. The AI Vision White paper, published by AI Sweden contains an instruction and further reading for this template.

AI
S W E D E N

1. What value should AI create and for whom?

How can AI be used to create value in our organization?

What do we want to use AI for? Ex. improve internal processes or external customer/end user facing ones, or both?

Why is AI a tool that fits our organization?

Which target groups will benefit from our work with AI?

2. Impact goals

Describe 3-7 goals for what the future with AI will look like.
What do you want to achieve with AI in 3-5 years time?

3. How do we relate to AI?
Shall we develop AI internally, with partners or procure the technology? What ethical and sustainability-related aspects are important? Are there more principles for how we want to work with AI?

4. The AI vision one-liner
1-2 sentences that describe the core of your AI vision

5. How does the AI vision relate and align to your general organizational strategy?
